---

## Summary

I am a Product Designer with a strong foundational knowledge of user-centered design principles from ideation to implementation. I have a B.S. in Psychology with over 10 years experience in relevant research skills, and a proven track record of effective collaboration within cross-functional teams. I apply research, usability testing, and data to inform innovative design solutions, and communicate design as a compelling story to diverse groups of stakeholders. My creativity and problem-solving drives my ability to juggle the challenges of working in a fast-paced, ever-changing industry.

## Experience

### *Freelance, Product Designer*

2022 - Present

- Apply best practice usability principles and knowledge of interaction design to identify elegant design solutions
- Develop a deep understanding of user needs and goals to facilitate successful end-to-end journeys
- Collaborate with clients to determine scope and goals to identify design solutions which create a satisfying experience for their users and drive positive business outcomes
- Research and develop user flows and personas to facilitate the design process
- Conduct effective competitive analysis and research to inform design solutions
- Create high-fidelity responsive website designs using Figma
- Develop and deploy website designs using WordPress, HTML and CSS
- Current Project: Website design and development in health and fitness industry

### *University of Pittsburgh, Project Administrator*

2020 - 2021

- Effectively collaborated with a cross-functional team conducting a wide range of research activities, including manuscript publication, grant submission, and research protocol
- Composed effective and compelling communications targeting a diverse range of audiences
- Designed team project tracking in the Monday Work OS platform to effectively coordinate team efforts
- Responsible for ensuring grant materials and manuscript submissions met extremely detailed organizational requirements

### *UPMC, Research Manager | Research Coordinator*

2015 - 2019

- Served as registry expert to coordinate multiple teams, meeting research and regulatory needs across multiple clinical registries
- Successfully navigated external audit process, and developed internal ad hoc reports
- Attended conferences annually to strengthen program functioning and follow current trends

*University of Pittsburgh, Research Data Specialist*

2010 - 2015

- Performed recruitment, data collection, entry and follow-up for multiple patient registries
- High degree of independence shown in order to execute job functions across multiple sites
- Collaborated with cross-functional team to develop and carry out robust research protocol

*University of Pittsburgh, Interview Supervisor | Interviewer*

2009 - 2010

- Led a team of interviewers in recruiting and interviewing over 5,000 participants
- Communicated importance and purpose of project driving effective participation
- Ensured adherence to survey protocol, and performed training with interviewers
